Don't Flush or Put Medicines Down the Drain!

If medications are flushed, they may not be removed from wastewater and could end up in the St. Louis River and Lake Superior. Help protect the water from contamination by medication; ***it's a no drainer!***

Can't make it on November 20th?

Watch for the next event or dispose of medications in the garbage.

Scratch out the patient's name

Add liquid, sawdust or spices to destroy the product

Seal container with strong tape

Hide it in a non-transparent container or bag

Throw it away as close to trash pick-up as possible

This project is a partnership between the Western Lake Superior Sanitary District, St. Louis County Sheriff's Office, Essentia Health & St. Luke's.
